HTML · CSS · JavaScript · ReactJS · NodeJs · Express · MongoDB · Firebase · Tailwind CSS

PERSONAL PROJECTS

Amazon Clone (01/2023 - 01/2023)
- This project is a clone of the popular e-commerce platform, Amazon, built with ReactJS, Stripe, and Firebase. The project comes with features such as product listings, shopping cart, payment gateway, and user authentication.

YouTube Clone (01/2023 - 01/2023)
- YouTube Clone! This is a ReactJS based web application that replicates the functionality of the popular video-sharing platform - YouTube.

Task Manager a REST-API (07/2022 - 07/2022)
- Developed a Task Manager REST API using technologies such as MongoDB, JWT, Express, and Node.js. Implemented features including user authentication, task creation and management, and data persistence using MongoDB. Utilized JWT for secure communication and Express framework to handle HTTP requests.

Chat GPT-3 UI/UX Design (02/2023 - 02/2023)
- This modern UI/UX design website is built using technologies, including HTML, CSS, and React JS. We have utilized the power of React JS to create a dynamic and interactive user interface that is both responsive and easy to navigate.

CERTIFICATES

Technical Support Fundamentals - Google (06/2020 - 07/2020)
Earned Technical Support Fundamentals certificate from Google, demonstrating a comprehensive understanding of computer systems, operating systems, the Internet, and applications. Acquired skills in assembling a computer from scratch, problem-solving, and using soft skills in an IT setting.

EXTRACURRICULAR ACTIVITIES

Android Lead, Google Developers Student Club (2022 - 2023)
Organized a successful Android Development bootcamp using Jetpack Compose, impacting over 200 students. Guided students on current technologies and resolved their issues. Demonstrated leadership skills in coordinating and executing the event.
